

## **We knew this was coming,**

Donald Trump recently retweeted a suggestion that **Dr. Fauci**, the director of the Centers for Disease Control, should be fired.

As you surely know, Dr. Fauci has emerged as a **desperately needed voice of reason** and steady leadership in a time of crisis.

He is the only qualified man in this administration willing to stand up to a **dangerously unfit president**.

**We need to act now.**

The Lincoln Project is calling on **Senate Republicans** to go on the record to **stand with Dr. Fauci**.

**Will you add your name to our petition?**

Thank you for standing with us.
