Subject: RE: monitoring developing U.S. social media narratives on Ukraine/Lutsenko-gate

[REDACTED] – key thing is to get up to ramming speed from the get go, because this story is being set up to both snowball and slow burn, with now four separate story lines having been put into play the past week: 1) Masha and NABU, with a dash of me as former DCM (for the domestic Ukrainian market); 2) 2016 collusion by NABU and the Clinton campaign (to get the President's team engaged in retweeting); 3) Biden and Burisma, looking ahead to 2020 (note: to my mind, the mother load and main thread to play out, possibly thru Nov 2020); and 4) "Soros" (highlighting one Embassy grantee, ANTAC, also received money from the Open Society Institute (likely aimed at elements in Congress).
