

Approved Comirnaty Label vs. "Comirnaty-Labeled" Vials Recently Discovered at Select Military Installations

COMIRNATY- covid-19

Approved Comirnaty Label found in FDA's Purple Book (Digital Record of ALL Licensed Shots)

Comirnaty Approved Label within Purple Book (Click Picture Above to go Label Info)

- Approved Contains "Proper Name- Comirnaty"
- Contains Name, address, and applicable license number (2229)
- Contains Expiration Date
- Redacted Area (light blue area) represents Manufacturer Location/Details because some of BioNTech's manufacturing locations are actually in China→These details should be present on the current "Comirnaty-labeled" vials in question...no manufacturer info is present
- **Approved Label contains Red Text "Comirnaty" Watermark all over the label**
- This picture represents what the label in question MUST look like exactly

"Comirnaty-Labeled" Vials, Pictured is a vial found at a Florida Coast Guard Station Medical Facility

- No **"Comirnaty" Watermark** with trade marked logo (faint red text seen in approved label in FDA Purple Book)
- Missing Manufacturer Information (address/info) in Box...in the exact shape as the redacted area (left)

DoD "Comirnaty-Labeled" Vial...Actually how DoJ references this product in question

- Label contains the Approved Contains "Proper Name- "Comirnaty"
- Label contains Name, applicable license number (2229) [BioNTech]
- Contains Expiration Date [Though these are seriously in question...most state Sep 2022]

Observations

- **Missing "Comirnaty" red text watermark, which is required to be present on the labels and is extra proprietary verification the label is authentic**
- DoJ and DoD refer to these vials as **"Comirnaty-labeled"** vials...remember when we all asked to have a Coca-Cola Labeled soft drink?!
- NO details provided on Manufacturer (Notice there is **no printed info** where the blue redacted area is on these vial labels in question)
- The two labels MUST match, the manufacturer inserts a watermark to further identify their product from a counterfeit label (much like USD, CAC Cards, other proprietary products).
- The missing watermark is a dead give-away that these labels are fabricated to appear to be the approved
- Expiration dates are different and some show up in September 2022...so only three months from receipt

§262. Regulation of biological products 42 USC § 262 Biological Products

(a) **Biologics license**
 (1) No person shall introduce or deliver for introduction into interstate commerce any biological product unless—
 (A) a biologics license under this subsection or subsection (k) is in effect for the biological product; and
 (B) each package of the biological product is plainly marked with—
 (i) the proper name of the biological product contained in the package;
 (ii) the name, address, and applicable license number of the manufacturer of the biological product; and
 (iii) the expiration date of the biological product.
