**Subject:** Interest in Tunnels Leading to the US Capitol

Good evening,

Meant to send this earlier today, but got tied up, we are running this out, but there is a historical website called "WashingtonTunnels.com" that has a bunch of information, to include maps on our Capitol system tunnels. The owner of the website submitted an online tip to the FBI NTOC stating that he has noticed a significant uptick in new visitors to his website. We have identified numerous open source comments indicating groups intentions of finding the tunnel entrances and confronting/blocking the MOC's. In addition, they specifically discuss attempting to get into the LOC to go to the basement and use the LOC tunnel to get to the Capitol. The website "TheDonald.Win" has been very active with promoting the photos of the tunnel system and stating their goal of finding Democratic Members early to block them from entering the Capitol.

Additionally, we have seen a huge uptick with reporting via open source of the groups intentions of forming a perimeter around the campus (indicated in image #5 above) from 0600-1000 hours in order to block all MOC's from getting inside our perimeter to the Buildings with spots identified for direct action. It's unknown if the groups will actually mobilize that early at 0600, but tomorrow is an all hands on deck for USCP and we will have additional assets to deal with any blocking of the barricades/entrances/etc. ID will continue to run out the investigative side of this and IICD is actively monitoring the information via open source. FBI also has this listed as Guardian and Sentinel case due to it coming into their NTOC.

Deputy Chief Sean P. Gallagher  
Protective Services Bureau Commander  
United States Capitol Police
